

AI Fundamental

Introduction to Artificial Intelligence

AI Ready ASEAN

In this module, you will learn about

1

What is AI?

2

How does AI come to be?

3

Common misconceptions & Why should we learn AI

What is AI?

A large, solid red shape occupies the bottom half of the slide. It has a flat top edge and a rounded bottom-right corner, extending from the left edge to the right edge of the frame.

Warmup

When you hear the word “AI,” what’s the first thing that pops into your mind?

Warmup

what’s the first thing that pops into your mind?

Robots
taking over

Science
Fiction Movies

Smart Apps
(Google Maps,
Gemini)

I don’t really
know

What is AI?

Artificial Intelligence (AI) is a technology that allows computers to **learn like humans**.

Unlike regular computer programs that follow fixed instructions, AI can learn from experience and **adapt** over time.

What is AI?

Regular program (rule-based)

Goal: recognize an apple

1. Person shows **10 photos of apples**
2. Person says **“These are apples.”**
3. Program stores these **exact 10 photos**
4. Person shows **a photo already in the program**
and asks, *“Is this an apple?”*
✓ Program says **“Yes”**
(because it matches a saved photo)
5. Person shows **a new apple photo (never seen before)**
and asks, *“Is this an apple?”*
✗ Program says **“No”**
(because it doesn't match any saved photo)

✓ **Only recognizes exact photos — no learning involved**

What is AI?

AI

Goal: recognize an apple

1. Person shows **10 photos of apples**
2. Person says **“These are apples.”**
3. AI **analyzes patterns** — color, shape, texture
— not just exact photos
4. Person shows **a new apple photo (never seen before)** and asks, *“Is this an apple?”*

✓ AI says **“Yes”**

(because it learned the general patterns of apples)

✓ **Learns and improves over time — can recognize new apples it hasn’t seen before**

What is AI?

AI is able to

Hear

Understand voice,
speech, music

See

Recognize object in
images

Think

Predict outcome based
on data

AI is not magic, but they can learn from example. The more example you give, the better they became
